

ACCESSIBILITY STATEMENT

YOUR VISION LLC

Draft Effective Date: October 23, 2026

Our Commitment

Your Vision LLC is committed to making our website accessible and usable by as many people as possible, including people with disabilities. We believe visitors should be able to access information about our branding, design, photography, videography, and other creative services with dignity and as independently as possible.

This statement describes our accessibility goals. It is not a guarantee that every part of the website or every third-party tool is fully accessible.

Accessibility Efforts

We aim to improve the accessibility and usability of our website over time. Our efforts may include reviewing page structure and headings, providing meaningful text alternatives for informative images, maintaining readable text and color contrast, supporting keyboard navigation where possible, and using clear labels for links and forms.

Website features, embedded content, and third-party services may have different accessibility capabilities. We encourage visitors to let us know when they encounter a barrier so we can review it.

Need Assistance or Found a Barrier?

If you have difficulty accessing any content on our website, need information in an alternative format, or would like to report an accessibility issue, please contact us. Where possible, tell us the page or feature involved, what you were trying to do, and how we can contact you. Please do not include sensitive personal information in your message.

We will make reasonable efforts to review accessibility inquiries and work with you to identify an appropriate way to provide the information or assistance you need.

Third-Party Content

Our website may include links, embeds, booking tools, social media content, or other services provided by third parties. We cannot control the accessibility of those external services, but we welcome reports about difficulties encountered through links or integrations on our website.

Ongoing Improvements

Accessibility is an ongoing process. We may review and improve website content and features as our website and services evolve. We welcome feedback that helps us identify barriers and improve the experience for visitors.
